Noah Dirck

Full-Stack Developer Resume

Atlanta, GA | (847) 420-8304

https://github.com/Niche-Quiche| www.linkedin.com/in/noah-dirck | noah.dirck@gmail.com

Full-Stack Developer with a strong passion to learn. I am proficient in building web applications and integrating Front and Back End software. As an eager team player, I am frequently asking questions and trying to work toward a solution that my teammates are satisfied with. To advance my knowledge and understanding, I always keep an open ear to those who have been in the industry longer than I have.

Software Development Skills

● HTML, CSS, Python, JavaScript, Node.js, Express, React, Redux, Sequelize, RESTful API, PostgreSQL

Education

DigitalCrafts | Certificate in Software Engineering | Atlanta, GA November 2021-Present

- Full-stack software development training program where I learned to use a variety of languages such as JavaScript, Python, SQL. The course has also taught me how to use front-end frameworks like React/Redux as well as server-side technologies like Node.js, Express, and Postman.

Georgia State University | B.A. in Philosophy | August 2018 – December 2020

Software Development Portfolio

Personal Portfolio: https://noah-dirck.netlify.app/ February 2021● Created an original Portfolio from scratch. Interactable design with smooth animations, check it out!

- Built with React, Redux, and Framer Motion

MnZ Travel: github.com/Niche-Quiche/Frontend_Project December 2021

● The team and I built a website where users can explore filming locations from their favorite movies and can also access real-time webcam feed from said locations.

- Responsibilities included utilizing several APIs to render information on the front end. Designed home page, search page and built the map page which loads the location markers.
- Built with HTML, CSS, Bootstrap, and vanilla JavaScript

Trivia Game: https://github.com/Niche-Quiche/Backend_Project January 2022 ● Team and I built a trivia game using the Open Trivia Database API, users can select from a variety of categories and difficulties. Users' scores and game ratings are saved and sent to our database ● Responsibilities included layout design, database initialization, and integrating an interactable front-end to connect to our back-end.

- Built with PostgresSQL and Sequelize

Professional Work Experience
